25X1A 6. It is recommended that subject Memorandum of Agreement be submitted, through channels, to the Office of the Comptroller for concurrence together with a proposed system for proper administrative processing of invoices covering billings contracted under the terms of the agreement. With regard to the latter, the procedures utilized by this office for processing of such invoices have been discussed informally with [REDACTED]. Any additional information desired will be furnished upon request.

25X1A 7. Difficulty has been experienced in the past with reference to the appropriation chargeable shown on bills of lading and transportation requests. The Transportation Division has initiated action whereby the Chief of Logistics requested the Comptroller to provide definite information regarding appropriation symbols to be used on transportation documents for effecting the movement of personnel and cargo. Since the Transportation Division does have an interest in the arrangements concerning the use of bills of lading, it is requested that the Transportation Division be informed whether or not the Comptroller approves the arrangement in this particular case. It is also requested that the Transportation Division be furnished a copy of any letters furnished to [REDACTED] pertaining to the agreement concerning GSA Bills of Lading. It is the opinion of the Transportation Division that expeditious handling should be given this action.

SIGNED
